Crude Protein, (Max).....	0.0%
Crude Fiber, (Max).....	0.0%
Calcium, (Min).....	0.0%
Calcium, (Max).....	0.0%
Proximate analysis (As is basis)	

INGREDIENTS:

Organic acids (dicarboxylic acids commonly found in plants)

DIRECTIONS:

Matrix DeNovo 30-30 is recommended for high producing dairy cows, especially when highly fermentable rations are being fed and cows are in a state of transition, such as 3 weeks before and after calving. Organic acids are precursors of propionate, an energy source for the cow. Organic acids may increase the use of lactate in the rumen to help stabilize rumen pH. Insure that sufficient protein and amino acid requirements are being met to balance with the additional energy being supplemented. Follow sound management practices and supply clean fresh water at all times.

Recommended Feeding Rates:

Prefresh Dry Cows (3 weeks prior to calving).....	100 - grams/cow/day
Lactating Cows.....	200 - grams/cow/day

Disclaimer: "Individual results may vary due to environment, breed, genetics, management and health differences. Therefore, specific guarantees about individual results are not made or assumed"
